

EUROPEAN GREEN DEAL IN THE CZECH DISINFORMATION SPACE

Throughout May 2022, researchers from the Prague Security Studies Institute monitored 35 outlets known for spreading disinformation and their messaging about the European Green Deal policy.

GREEN DEAL ON CZECH FACEBOOK

Criticism prevailed during the debate on the Green Deal policy. It was presented as the cause of most current economic and energy-related problems in the Czech Republic.

“A systemic solution of the extreme price increase is to withdraw from the EU Green Deal and the system of trading carbon credit and to stop exporting our electricity to supranational energy exchanges.”

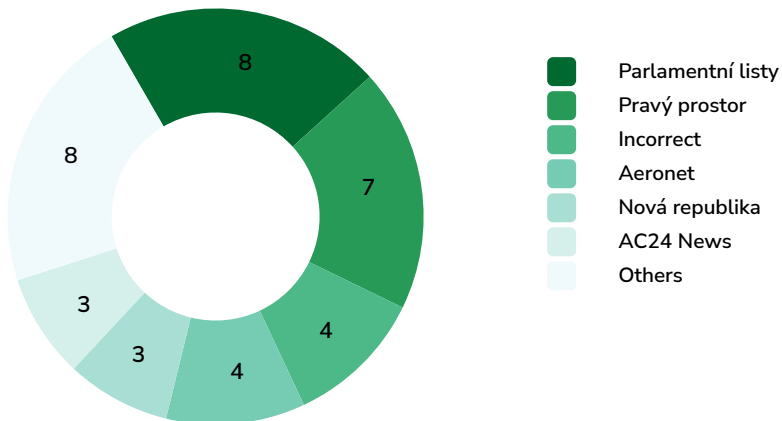

The Green Deal was used as a proxy topic in political contexts to amplify criticism of the current Czech government. Instead of taking care of the citizens, the government supposedly drags the Czechs into irrational projects such as the Green Deal which further damage the living standard of the citizens.

**“Is water pouring down your leaky roof into your bed?
Take an umbrella and keep sleeping in peace!”**

GREEN DEAL ON CZECH WEBSITES KNOWN FOR SPREADING DISINFORMATION

Commentators on monitored websites saw Green Deal as an ideological project forced forward despite the unreliability of green energy sources.

“We underestimate the fact that the European Union is able to sustain the unsustainable even at the cost of losses.”

Ivan David (SPD) on Parlamentní listy
